

## INKJETMALL CUSTOM ICC PROFILE INSTRUCTIONS

1. Please follow all instructions below exactly.
2. Make sure you have located the swatch files that are along-side this pdf in the DTP-70-ICC folder.
3. Download and install Adobe Color Print Utility here:  
<https://helpx.adobe.com/photoshop/kb/no-color-management-option-missing.html>
4. After installing Adobe Color Print Utility, open it, and go to File>Page Setup.
5. Set the page setup to be your paper size oriented in portrait mode. (You should be using Letter sized paper.)
6. Open the first file of the unzipped swatch set (3000Patches-DTP70 1.tif).
7. Got to File->Print
8. Select the printer you will be profiling.
9. For Epson printers, select "Last Used Settings" under the Presets menu.
10. Now go through and set the desired printer resolution/media-type/speed you need for your specific paper. For matte papers we suggest Velvet Fine Art or Hotpress Bright as a media type, 2880dpi, and UniDirection printing (High Speed OFF).
11. Click Print.
12. Open the next swatch file and go directly to File->Print, all the settings should be set to "Last Used Settings" aka your first swatch print settings.
13. Click Print.
14. Repeat steps 12 and 13 until all sheets are printed.
15. Mail all swatch prints flat to InkjetMall, c/o Custom Profiling, 17 Powder Spring Rd, Topsham, VT 05076
16. Include your desired printer profile names (we will provide names in standard format if the desired names are not included) along with the email address to send the completed ICC profiles to.
17. We send both a complete custom ICC profile along with an i1Profiler environment with all measurement data included just in case the profile needs to be rebuilt or edited with different characteristics in the future.

For any questions with your order email [support@inkjetmall.com](mailto:support@inkjetmall.com).

Note: All orders must be paid in advance prior to gaining support. Refunds are available less a \$25.00 fee.
